

Protect your parking space!

The environmentally-friendly parking space protection system.

SOMMER offers an automatic appliance to **protect the personal parking lot** against unauthorized users.

The mechanism works **without any cable**, with remote control and is powered by a **solar modul**.

▶ low voltage 12 V DC with solar module

▶ transmitter included

▶ obstacle recognition with reversion in both directions (up/down)

▶ simple manual emergency release mechanism

▶ spring-loaded frame returns to starting position upon forced motions

Parking space protection (item no. 7600V000)

length: 510 mm without frame; 760 mm with frame / width: 480 mm /
1st height: approx. 120 mm; 2nd height: approx. 620 mm with frame in withdrawn position

The parking space protection system includes:

- ▶ an automated curved parking barrier and a stainless steel principal element
- ▶ with a display console
- ▶ a rechargeable battery; operational for approx. 4 weeks if not exposed to direct sunlight
- ▶ with an integrated high-performance solar cell
- ▶ integrated control system with monitoring of the battery charge level and obstacle recognition for both directions
- ▶ 2-command transmitter included
- ▶ 2 keys for the emergency release of the parking barrier
